

Mana Soap MD

Regenerate pure baby skin...

for your **wrinkles** over keratin
skin roughness **blemish** **acne skin** etc.

Mana Soap MD is highly effective to skin roughness and acne skin in daily facial cleansing due to two main ingredients: glycolic acid and JBP Placental Extract.

Glycolic acid helps exfoliate over keratin of your skin to revitalize and brighten complexions up. JBP Placental Extract moisturizes your face and boosts the skin's metabolism. You can choose from two types depending to your skin conditions.

**Clear up acnes,
Free of dryness and redness.**

USERS VOICE

Tried EVERYTHING ... this actually works!

For a long time, I had suffered with acne all over my face because of my daily stress. I tried every acne treatment products, but I couldn't find exactly what I wanted. I learned glycolic acid exfoliates over keratin and dirt on the skin, but I felt a tingling sensation due to additives. So, I decided to make the additive-free soap containing glycolic acid by myself, and developed Mana Soap MD.

Mana Soap MD produces a soft, mild lather to exfoliate impurities on skin gently, and my facial condition was dramatically improved. Its reputation has been spread and became a success in Japan.

Ms. Hiromi Konishi — Planner for Mana Soap MD

Noticeably
reduces acne scars!

BEFORE — Acne scars

AFTER — 14 months

QUALITY

Natural and Handmade — It is our philosophy and pride.

Mana Soap MD is hand-made and employed **“Cold Manufacturing Process”** that is natural drying method.

This method features natural matured process without using any heat, which avoid the deterioration of the ingredients. As a result, all active ingredients remain as they are, and gentle to your skin.

Ingredients — Maximizing the healing power of nature.

Additive-free*
